

Visit to Leprosy Home by Interact Club Students

On 22nd July, 2019, the students of Interact Club went to leprosy home to meet and greet the people. A good amount of donations has been made like soaps, biscuits, clothes etc.

Around 15 cartons were packed with the above mentioned items. Our students donated them with happiness.

Also, the students gained a lot of information about the disease and its cure. Around 120 families were living there and most of them were cured.

The joy of giving filled our hearts with love and care.
